for shallow waters

GRP
monohull

Self-draining

The new, even more user friendly version of the electric **Microwatt**, equipped with a practical next-generation outboard motor.

The **design** is classic Microwatt: **contemporary**, while still maintaining the style of a traditional boat. Its **ergonomics** and **usability** make it an ideal electric boat for the tourism sector, but it is also perfect for private indivi-

duals and families. Microwatt 2.0 can carry up to **7 people**, equipped with an **easy-to-maintain outboard** and its autonomy is an impressive **8 hours**.

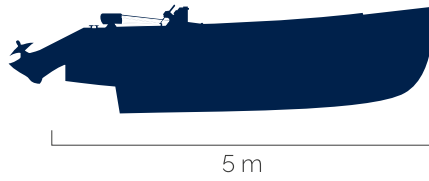

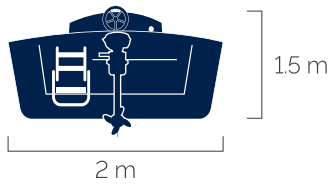

For us, safety is as important as **sustainability**: the **Microwatt's hull is self draining** and can be equipped with a **bilge pump** and **navigation lights** so you can always sail worry-free.

green, fun & tech

DIMENSIONS

COLOURS

Elegance in two colours

The Microwatt electric boat has been designed to offer the ultimate expression of elegance, beginning with the two colours that tell of wonderful journeys in the stillness of nature.
