Self-draining

Microwatt is the **innovative and environmentally friendly** electric boat chosen by GardaSolar as a model for **eco-sustainable navigation**. It is controlled with a **steering wheel** and its design is **contemporary**, while still maintaining the style of a traditional boat. Its **ergonomics** and **usability** make it an ideal electric boat for the tourism sector, but it

is also perfect for private individuals and families. Microwatt can carry up to **7 people**, with an impressive **8 hours autonomy**. For us, **safety is as important as sustainability**: the Microwatt's hull is **self draining** and can be equipped with a **bilge pump** and **navigation lights** so you can always sail worry-free.
